

C² HARD BLEND

Blended lithium densifier perfect for any job.

C² Hard Blend's unique formulation of potassium and lithium silicates is both efficient and convenient. C² Hard Blend eliminates the need for overspray, flushing and scrubbing. Floors are ready to use within one hour of application. The potassium silicate in the formulation allows C² Hard Blend to be burnished up for a quick sheen on floors untreated with any sealers.

- Specifically designed for steel-troweled, power troweled or burnished concrete finishes
- Improves abrasion-resistance, reduces surface dusting
- No flushing or scrubbing required
- Can be burnished for a quick sheen
