

C² HARD

The ultimate lithium densifier for concrete.

C² Hard revolutionized concrete densification by eliminating the need for overspray, flushing and scrubbing. Simply spray, spread with a microfiber and the job is done. Floors are ready to use within one hour of application and the chemical reaction between the lithium and the calcium hydroxide in the concrete is almost instant.

- The only C² densifier that can be used on fresh concrete
- Improves abrasion-resistance, reduces surface dusting
- No flushing or scrubbing required
- Reduces labor hours and product usage
- Renders floors of any age dust-proof
