

C² SUPER HARD

The premium lithium densifier for concrete.

C² Super Hard's patented lithium silicate treatment penetrates deep into concrete, producing durable calcium silicate hydrate within the pores. Treated surfaces resist water intrusion, abrasion, and dusting–delivering long-term performance with reduced maintenance.

- Easy, one step application. No scrubbing. No flushing. No caustic wastewater
- Penetrates and reacts quickly to produce better initial and ultimate hardness.
- Outstanding on an extremely porous, low quality floors
- Provides better abrasion resistance than conventional hardeners
- Renders floors of any age dust-proof
