CRETE COLORS INTERNATIONAL

NO-HASSLE DUSTPROOFING

Spray on. Spread out. Done!
Get immediate results with C² lithium densifiers, the advanced alternatives to conventional sodium or potassium silicate surface hardeners.

GET RESULTS

Create lasting results that improve appearance, surface abrasion and occupant health.

Combat surface ASR. (Alkali silicate reaction)

Will not yellow, discolor, peel or flake.

SAVE MONEY

Less time + better coverage = more profit.

No scrubbing or flushing = less time, less labor & fewer hassles.

Lithium technology outperforms the rest.

BE WORRY-FREE

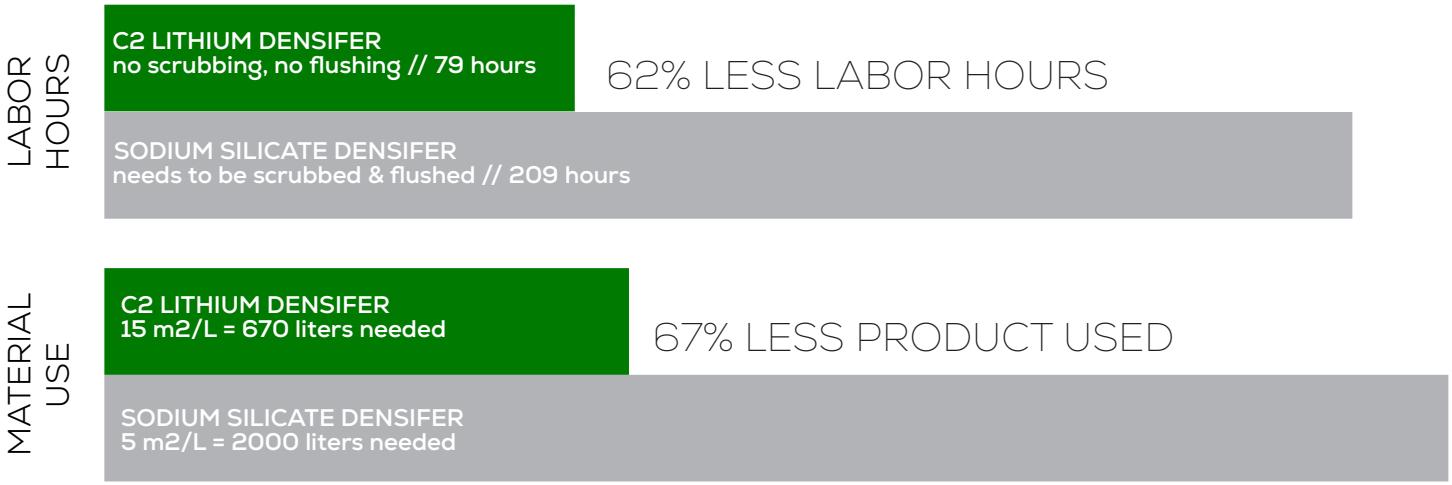

Extended dustproofing warranty.

Treated surface is easy to maintain and requires no waxing.

No excess material to collect and dispose of properly.

COST COMPARISON

10,000 m² job

TECHNOLOGY

C^2 densifiers' lithium molecules react quickly and effectively with the concrete, creating a hardened and dust-proofed surface as quickly as one hour after application.

TRAINING

Make sure the product goes on right the first time with demos and hands-on training. Contact your local C^2 partner today.

SUPPORT

We are here to serve and guide you to success. Our C^2 Family spans over 40 countries across the world.

CERTIFIED, SAFE & RELIABLE

C^2 densifiers go above and beyond with certifications from NSF, SCS and are LEED friendly. We value the importance of knowing that our products are safe for our applicators and for our environment.
